

Index Dividend

If any constituent of underlying index has declared a dividend and account is holding Cash Index CFD position for ex-date -1, then account will receive or pay dividend amount. Long position receives dividend and Short position pays dividend. CGS International receives dividends in terms of Index points from liquidity provider and applies directly to applicable positions.

Index Dividend Example

Index CFD: US30.IXC

If constituents for Index Dow Jones announced dividends ex date 30-Aug-16.
Total Dividend in terms of Index Point = 15.272

If Position held overnight as of close 29-Aug-16: Long 20
Index Dividend receive = Quantity * Index points = 20 * 15.272 = USD 305.44

If Position held overnight as of close 29-Aug-16: Short 20
Index Dividend pay = Quantity * Index points = -20 * 15.272 = USD 305.44

- *Please note that different data provider such as Bloomberg, Markit etc may have minor differences in terms of Index points. CGS International applied Index points as provided by our liquidity provider which may have minor deviation if compared to different data provider.*
