Banks – Remain cautious on non-bank businesses

Net profit from the commercial banking business will form 92-95% of SCB's total consolidated net profit over the next three years, in our view. Our worst-case scenario suggests dividend yield declining to 7.0-7.3% in 2026F-27F, still significantly higher than the Thai equity market's 4%. Reiterate Add with a lower TP of THB150. Banks – Diverging trends in GIL and total provision

We estimate banks' loan growth at 4.9% in 2025 and 4.5-5.5% in 2026F. Banks' GIL rose by RM430.2m (+1.3% mom) in Nov 25 but total provision slid by RM459.6m mom in Nov 25. Reiterate Overweight on Malaysian banks given our expectations of write-backs in management overlay in FY26-27F and rising dividend payout ratios.
